

The HCCR Graduiertenkolleg "Hamburg Cardiovascular School" is announcing

## Scholarships for Experimental or Clinical Cardiovascular M.D. Thesis Work

*"My time in the cardiovascular school has not only taught me basic knowledge about research, cardiology and asking the right questions about the data I got, but also about myself. After these months I do not see myself only a medical student, but also as a scientist..." L.K.*

- 12 month-experimental or clinical M. D. thesis on innovative cardiovascular projects starting in October 2025
- Focus on cardiac and vascular biology, pathophysiology, tissue engineering, clinical projects and/or transgenic models
- Supervision by an interdisciplinary team of clinicians and basic scientists
- Regular seminars and workshops to improve the general scientific education
- Monthly journal club to critically evaluate recently published scientific articles
- HCCR and DZHK seminar series to obtain a broad overview of recent scientific projects and to meet experts in the cardiovascular field
- Scientific lectures from invited, external speakers
- Financial support in form of a 992 €/month scholarship to fully concentrate on science

Please send your application with CV, letter of motivation, certificate of preliminary examination (iMed certificate/Physikumszeugnis) by 31<sup>st</sup> of May 2025 per Email to:

Claudia Kaß, Institut für Experimentelle Herz-Kreislaufforschung, [c.kass@uke.de](mailto:c.kass@uke.de)
